EXPERIENCE

I have 3 years of experience in IT Sector. I am a working experienced person in DOTNET technology. Worked in various roles both as a Developer and Support person in multiple projects. Trained in Agile methodology.

Cognizant, Chennai — *Programmer Analyst*

May 2020 – February 2022

I was trained in C#, ASP.Net MVC, MS SQL Server, Entity Framework, ASP.Net Core, HTML, CSS, GOOGLE CLOUD and basics of Angular.

Worked as a Dot Net Developer to implement Service based application for US Based Client to manage which includes development in MVC application and stabilizing multi tasked Console applications.

LogicMatter Inc., Hyderabad -- *System Engineer*

February 2022 – Present

Currently I am working as a Lead DOTNET Developer in LogicMatter (Reporting Service Company) to develop Product Based Application for multiple clients.

Working in C#, ASP.Net Core, MS SQL Server.

My Role is to implement Multiple Connector using .Net Core application for retrieving Extract Load (ETL) from multiple API services.

Managing multi domain application in a single package based on Product License which includes Product package automatic installation with necessary prerequisites and deploying application in IIS.

SKILLS

Adaptability to Learn

Time management for work balancing

Self Motivating

Ability to work under pressure

June 2012 - May 2013

G.P.A - 9.7

SRI CHAITANYA JUNIOR COLLEGE, VIJAYAWADA -12th

June 2013 - May 2015

Percentage - 95.1

SASTRA DEEMED TO BE UNIVERSITY, THANJAVUR -BTECH (EEE)

July 2016 - May 2020

C.G.P.A - 7.66

PROJECTS

Macy's – UOP (Cognizant)

Technical Skills: ASP.NET MVC, Entity Framework

I worked as a .Net Developer for merging two different Order Capture & Order Management(OCOM) into a Unified Order Platform(UOP) to reduce the gap flow between the systems so that both Macy's and Bloomingdales have a single Oder System which is easy for tracking down the shipment request of the customer and delivering the goods in time.

Macy's – Finance Core (Cognizant)

Technical Skills: ASP.NET Core, Angular

My role as a .Net Developer is to work with Finance team on extracting clocking of employees from third party application (Kronos) in Macy's system through the .Net application and process the data for their work wages on Audit and Pay check of the employees of entire Macy's organization. My part as a .Net developer is to fix one particular issue which deals with few Rehire colleagues pay checks as they are not added into Kronos System which still shows them as terminated. I had to make code fix in order to process into Kronos System so that they get paid.

Macy's - Work Force Management (Cognizant)

Technical Skills: ASP.NET MVC, Entity Framework

 I worked as a .Net support developer to the entire Macy's Work Flow Management. Dealing with punch in/clock in issues of the user and analyzing the situation, providing the resolution to the user and making necessary code changes and removing the bugs to avoid future case scenario.

EMIZA (LogicMatter Inc.)

Technical Skills: ASP.NET Core, SQL Server, Basic Angular

Currently working as Lead DOTNET Back End Developer for the Retail Sector Client, providing new feature development for our product. I had built them multiple Connectors for extracting data from third party applications (Easy-Ecom and Uniware applications) which store the day to day data on Orders Processing, Inventory for multiple customers. Dynamic data tracing based on next runs new information and updating the existing system.

AEROBIOTIX (LogicMatter Inc.)

Technical Skills: ASP.NET Core, SQL Server, Basic Angular

I have to implement unique sync Connector level process for Excel, CSV and DB files for reading Machine Data through ETL process from multiple source locations like Google Drive, One Drive files, manual Zip files and SQLite DB files based on the file modified date for various hospital sites and process the information based on Rooms and design the warning system on the Air Quality.

Common Package Design (LogicMatter Inc.)

Designed Common Package 3.0 advanced version of the product, which includes a single Installation package (PM-Manager). Designed this PM-Manager application based on License functionality (contains expiry date and domain level functionality). Implemented C# code to work completely based on domain license in the sub level which includes **Prerequisites Auto Installation** (Sql Server, SSRS, DotNet Runtime, URL write, respective DB creation with necessary permissions).

Maintaining sub-applications (Platform-.Net and Portal-Angular) based on domain and hosting them on IIS with deployment process included in automation.

Technical Strength & Work Expertise

Good at working at Open Source and secured 3rd Party API level design and integrating them using REST services in the existing system. I have so far worked in multiple API level services including Auth Validation (using API Key & User Name and Password) Cloud Data fetching (Tridium Inc, EasyEcom and Uniware) for different HTTP methods extracting data in different output formats (Json, CSV, Xml).

Integrating **Grafana** Service into API level structure and pulling up the dashboard dynamically in to HTML output and embedding that into Angular page.

Worked on **SSRS** reports with default services for dynamically pulling up of SSRS templates into viewable/editable formats in UI for smooth report monitoring and data accuracy for user experience.

Worked on SSRS template deployment with file upload functionality, validating the data sets and dynamically assigning the respective data sources (specific DB connection) aligned to the Report Templates.

Worked on migrating .Net Core 3.1 system to .Net 6.1 of the entire project solution with all the internal libraries upgradation and clearing the dependency injection issues for multiple Nuget packages.

Implemented Data extraction layer for **Compass Systems** through API service, pulling up the data dynamically based on the required parameters and storing the real time data into Secured cloud network for Data reporting.

Worked on **Quartz Services** for dynamic data triggering and report generation using Cron Expressions based on the trigger functionality on Schedule time. Additionally implemented Watcher Schedule application to keep Quartz service running 24/7 on IIS.

Work Achievements

LogicMatter Inc

Received **Client Appraisal** for product delivery meeting before deadline, proper service maintenance of Product without any issues from User end with stable system.

Cognizant

Promoted from "Programmer Trainee" to "Programmer Analyst" for development and supporting in clearing bugs for stabilizing multiple applications.
